

Recycled

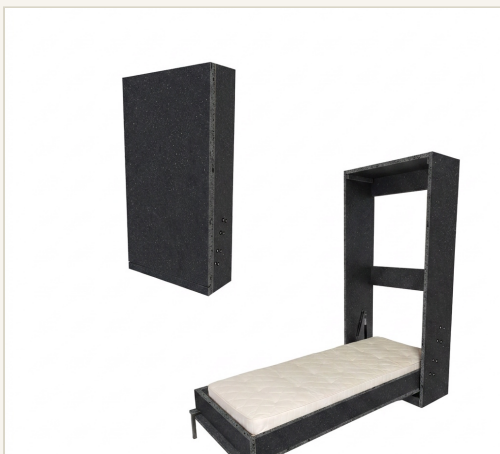

A furniture series made from recycled materials — Österlen Inredning

Three pieces of furniture, one idea: material that already exists should get a new life instead of becoming waste. In the Recycled series, recycled plastic, recycled textiles and decommissioned bus seats meet the craftsmanship and function of Österlen Inredning — without compromising on quality, comfort or design.

RECYCLED MATERIAL

MANUFACTURED CLOSE TO SWEDEN

ÖSTERLEN INREDNING

The EKOpoly material up close — a uniform surface with a foamed core.

01 · WALL BED

Wall Bed in EKOpoly

An upright wall bed whose frame is made from EKOpoly, a board made from 100% recycled polyethylene and polypropylene. The material is UV-treated, moisture- and impact-resistant, and won't rot — making it just as sturdy as traditional MDF or plywood versions, but with a significantly lower climate footprint. Gas struts let the wall bed open and close smoothly and almost silently.

MATERIAL

EKOpoly — 100% recycled PE/PP board

BED SIZE

80×200 – 180×200 cm

HEIGHT / DEPTH

224 cm / 44 cm (Delux: 235 / 57 cm)

BED FRAME

Finger-jointed pine, stainless steel legs

MATTRESS THICKNESS

20–31 cm (Delux up to 45 cm)

FUNCTION

Gas-strut assisted, quiet opening/closing

Circular benefit: EKOpoly is itself recyclable and building-material assessed — the wall bed's frame can in turn be recycled again the day it's served its purpose.

Cross-section: the core is built from recycled textile fibre.

02 · MATTRESS

Futon Mattress with Recycled Filling

The core of this futon mattress consists of 100% recycled textile fibre — wool, cotton and polyester — pressed into a filling that performs just as well as traditional cotton stuffing, but weighs significantly less. The cover is 100% cotton and comes in several colours.

FILLING

100% recycled textile fibre
(wool/cotton/polyester)

THICKNESS

Approx. 24 cm

COVER

100% cotton, several colour options

SIZES

90×200 / 140×200 / 160×200 /
180×200 cm

Circular benefit: every mattress gives new life to textile fibre that would otherwise have gone to incineration or landfill.

Cross-section: cold-foam cushion with fibre wadding in recycled cover fabric.

03 · SOFA BED

The Gladsax Sofa

The Gladsax sofa is upholstered in recycled fabric from decommissioned bus seats — the well-known, patterned fabrics get a second life as a robust, bold 3-seater sofa bed. The frame is wood, reinforced with masonite and fibre wadding, and the cushions are made from recycled textile fibre with a layer of latex on top, covered in soft fibre wadding.

COVER

Recycled fabric from bus seats
(public transport)

DIMENSIONS (W×D×H)

185 × 85 × 97 cm

SEAT HEIGHT / DEPTH

45 cm / 53 cm

BED SIZE UNFOLDED

185 × 140 cm

FRAME

Wood, dowel-jointed, solid beech
legs

FUNCTION

Fold-out sofa bed, guest bed incl.
7 cm foam mattress

Circular benefit: fabric that would otherwise be scrapped when buses are decommissioned becomes durable, story-rich upholstery.
